supplyAware™

from **ELM ANALYTICS, LLC**

Rapidly and inexpensively deployed
supply chain mapping and risk assessment
for a single plant or an entire enterprise.

THE BASICS

With minimal expense and effort, you can gain valuable insight into the structure and health of the supply chains beneath your purchased parts and services.

supplyAware™ is a cloud-based platform for efficiently mapping manufacturing supply chains.

Its Semi-Transparent Supply™ approach delivers supply chain visibility while respecting each manufacturer's need for confidentiality, privacy and secrecy.

supplyAware™ is simple and efficient. You update the public profile for your manufacturing site, upload your list of suppliers and we take it from there.

We validate and augment your data and manage the onboarding of your suppliers. As we perform this same service for each of your suppliers, we effectively map your supply chain to its limits.

YOUR DATA IS SAFE

While your public profile is visible to the world, your relationship with your suppliers is kept private.

You will gain access to augmented profiles for each of your suppliers and hard data on the character of their supply chains, but not the names and locations of their suppliers.

Semi-Transparent Supply™ yields critical supply chain risk data without sacrificing confidentiality.

EFFECTIVE AND EFFICIENT

The effort required of you and your suppliers is minimal. You need only to populate and upload a spreadsheet with your direct suppliers. supplyAware™ then performs important services that are otherwise costly and burdensome:

- Address Validation
- Supplier Profile Augmentation
- Supplier Outreach and Support
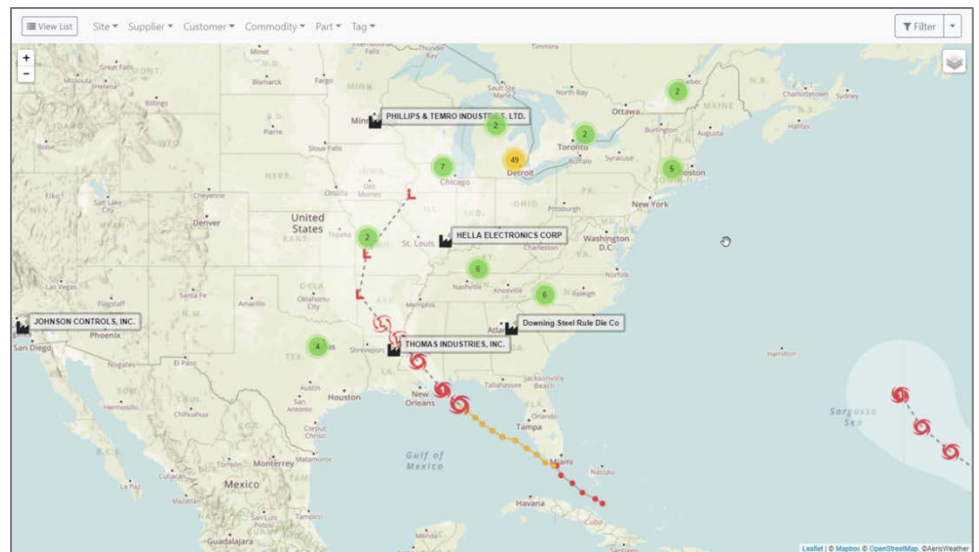

VISIBILITY OF SUB-TIER STRUCTURE

supplyAware™ provides critically needed visibility to the structure of the supply chains beneath your suppliers:

- Supplier Counts
- Trade Routes
- Border Crossings
- Choke Points

POWERFUL MAPPING

supplyAware™ reduces the burden of monitoring your supply base with a powerful mapping engine that displays your company's direct suppliers and customers along with valuable endpoint data.
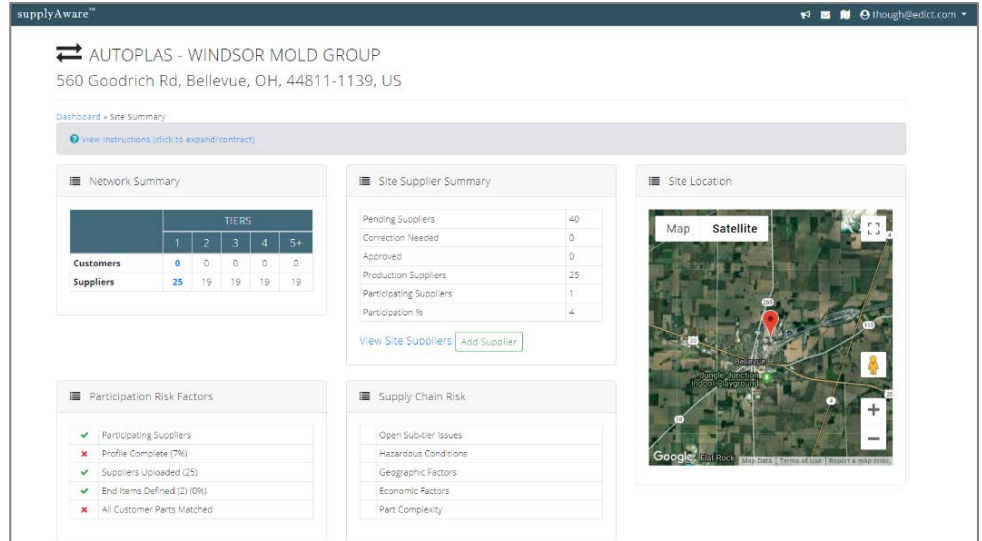

- Tropical Storm Paths
- Storm Cells
- Rain Forecasts
- Snow Forecasts
- Ice Forecasts
- Flooding Reports
- US Congressional Districts
- Ports
- Airports
- Related Manufacturing Sites
- Forecast Heat Indices
- Earthquakes
- Engineering Higher Ed Sites

RICH SUPPLIER PROFILES

In completing the public profile, each manufacturing site is providing information that is valuable to their customers and suppliers. Data is timely and accurate because it is direct from the source.

- Site Locations
- Parts Manufactured
- Processes Employed
- Materials Consumed
- Quality Certifications
- R&D Capabilities
- NAICS Codes
- Unions Present
- Lean Metrics
- Shift Patterns
- Site Capacity Estimates
- Site Contacts
- Related Companies and Plants

SUPPLIER SEGMENTATION

At every level in the supply chain, supplyAware™ facilitates segmentation of a manufacturing site's suppliers by any combination of end item, commodity, and part name. As a result, our supply chain analytics are accurate and diagnostic of actual problems.

PRICING

Subscription licensing is on a per seat basis and can be purchased monthly or annually in advance in multi-seat subscriptions of 5, 10 20 and 50 users.

Users are protected with mandatory two-factor authentication employed to enhance user account security.

Accounts auto-renew at the end of each subscription period and can be cancelled at any time. Cancellations are effective at the end of the current term.

	SEATS			
	5	10	20	50
MONTHLY	$99	$198	$396	$990
ANNUALLY	$990	$1980	$3960	$9900
